Notes

1. Numbers are for current concept; design refinements will adjust numbers slightly.
2. Programmed and scheduled construction corresponds to Sections 1, 2 and a portion of 3 only.
3. “2010 +” and “2025 +” are year estimates of when traffic projections suggest volumes will reach 13,000 vehicles per day. Actual construction will not occur in any section until or if volumes grow to at least 13,000 vehicles per day.
